

POLICY

Environment

Australia is one of the most beautiful countries in the world.

As an organisation, we respect the environment and take reasonable steps to be responsible and protect Australia's natural resources. Our approach is embedded within our operations from the terminal to the tank with initiatives to reduce our environmental footprint.

IOR's environmental initiatives include:

- Smarter route planning to reduce distances travelled to deliver fuel and as a result reduce exhaust emissions, improve fuel efficiency, and increase the lifetime of our truck tyres.
- Investing in a modern fleet of trucks with improved fuel efficiency and reduced road noise.
- Using renewable sources of energy to power our unmanned diesel stops in remote locations.
- Making AdBlue available throughout the Diesel Network so customers may reduce the oxides and nitrogen emitted from their truck engines.

Find out more about how IOR is reducing our impact on our environment. Ask us today!

Our goal is that no product will touch the ground. We empower our team to identify, assess and manage opportunities to reduce our environmental impact."

Stewart Morland
IOR Managing Director
